Hospitals and healthcare institutions require floor and wall solutions that are durable, long-lasting, functional and aesthetically-pleasing. These floors and walls must not only be hygienic and sanitary, they must also stand up to the rigors of around-the-clock hospital operations.

Protective Industrial Polymers' HealthSpec line of antimicrobial floor and wall coating systems have been specifically developed to provide a safe, long-lasting, durable and aesthetically-pleasing foundation for your hospital or healthcare operation.

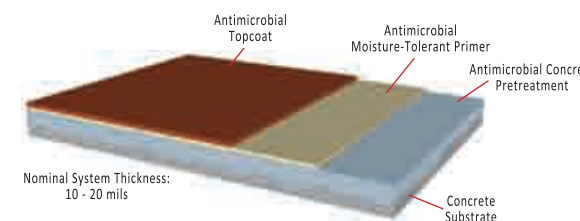

HealthSpec floor and wall systems systems have been formulated to withstand even the highest degree of healthcare-related wear and tear. From superior resilience, chemical resistance and compressive strength to aggressive wear and abrasion resistance, these systems can take a beating while continuing to perform for years to come.

From high-performance antimicrobial coating and mortar systems to ergonomic, static-control and decorative systems, the HealthSpec line of floor and wall systems has got you covered. Whether you are an independent healthcare institution, medical lab or large-scale community hospital, we have the right floor and wall solution to meet and exceed your unique requirements.

HealthSpec Floor & Wall Systems Features:

- Extremely Durable
- Flexible, Resilient "Comfort" Options
- Scratch & Abrasion Resistant
- Resistant to Wide Range of Chemicals
- Easy to Clean & Maintain
- Redundant Deep-Substrate Penetrating Antimicrobial Properties
- Thermal Shock-Resistant
- Long-Lasting Means Lower Life Cycle Costs
- Available in a Wide Array of Decorative Colors & Textures

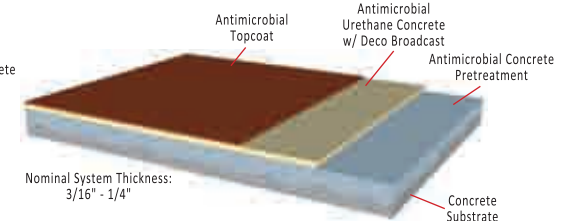

HealthSpec Antimicrobial Flooring Systems

HealthSpec BioCrobe-CS

General-Use Fast-Track Antimicrobial Coating System

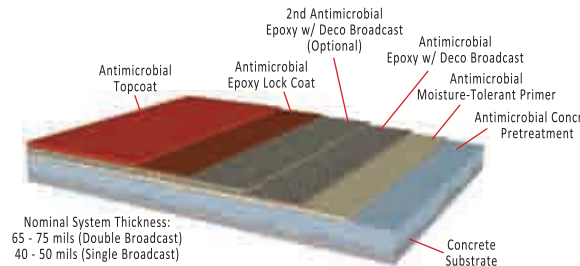

A general purpose antimicrobial coating system that exhibits excellent chemical, wear and abrasion resistance. This system is suited for hospital or institutional areas requiring antimicrobial protection combined with quick turnaround.

HealthSpec DecoCrobe-MT

Antimicrobial Thermal Shock-Resistant Decorative System

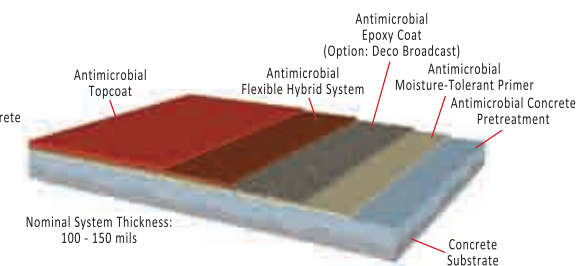

A decorative, antimicrobial, shock-resistant mortar/resurfacer system that exhibits excellent chemical, wear, abrasion and thermal-shock resistance. Ideally suited for high-traffic corridors or washdown areas subject to thermal cycling.

HealthSpec DecoCrobe-BC

Antimicrobial Full-Broadcast Decorative System

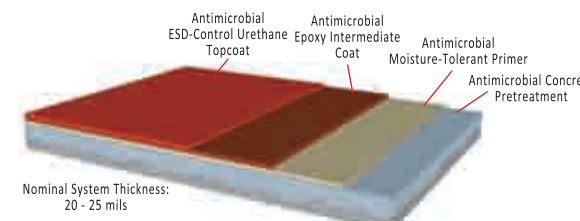

An antimicrobial decorative system utilizing vinyl flakes or colored quartz aggregate to achieve various aesthetic results. This system is suited for hallways, cafeterias, lobbies or any other area requiring beauty combined with performance.

HealthSpec DecoCrobe-Ergo

Antimicrobial Ergonomic Anti-Fatigue Decorative System

A highly-flexible, anti-fatigue decorative coating system that exhibits excellent chemical and wear resistance. Suited for healthcare floor areas such as surgical suites, patient rooms or any area requiring comfort and resilience.

HealthSpec StatCrobe

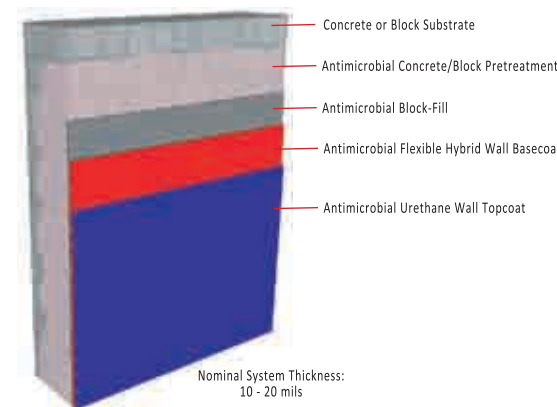

Antimicrobial Static-Control Coating System

An antimicrobial ESD-control system that exhibits superior static-control properties. Suited for areas where the damaging effects of electrostatic discharge cannot be tolerated, including surgical suites, chemical storage areas, equipment and data rooms.

HealthSpec Antimicrobial Wall Coating Systems

HealthSpec FlexWall

Antimicrobial Flexible Wall System

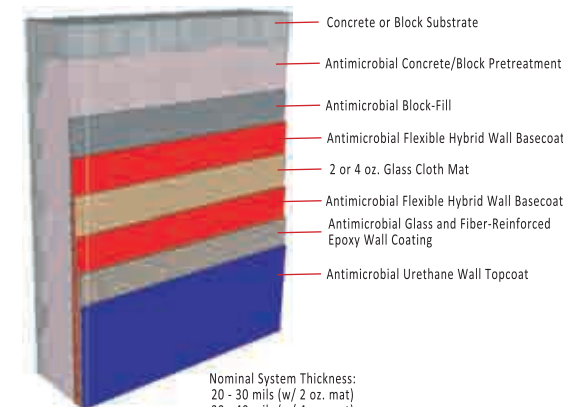

A high-performance, antimicrobial, flexible hybrid wall system suited for hospital or institutional areas where general chemical, impact and thermal-shock resistance are a performance requirement.

HealthSpec FiberWall

Antimicrobial Glass and Fiber-Reinforced Wall System

A high-performance, antimicrobial, reinforced wall system suited for hospital or institutional areas where enhanced chemical and wear resistance, as well as UV-stability are performance requirements.

HealthSpec GlassMat

Antimicrobial Glass Cloth-Reinforced Wall System

An antimicrobial glass cloth-reinforced wall system that features a very smooth, easy-to-wash surface texture. This system is formulated for use in areas where superior chemical resistance, durability and UV-stability are crucial.

Areas of Use

Surgical Suites & Sterile Fields

Patient Rooms

Labs & Nurse Stations

Cafeterias, Lobbies & Restrooms

Hallways & Corridors

Mechanical & Equipment Rooms

Loading Docks & Warehouse Areas
